## Unemployment Insurance Questions and Answers

In this column we publish questions about unemployment insurance and employment, together with answers received from the Unemployment Insurance Commission.

Following are some questions with answers which may be of interest to you:

**Q** If my book is destroyed by fire, what do I do?

**A** You should report the loss to the local office of the Commission. If the Commission is satisfied that the book actually was destroyed by fire, it will, if possible, rebuild your contribution record in order to give you credit for the lost contributions.

**Q** Will you please explain to me the difference between ordinary benefits and seasonal benefits?

**A** The main differences are two: 1 Seasonal benefit can be paid only in respect of unemployment between January 1 and April 15, whereas ordinary benefit can be paid for unemployment at any time of the year.

2 Seasonal benefit is payable under certain conditions to a claimant who, although unemployed and available for work, has not enough qualifying contributions to his credit to satisfy the conditions for ordinary benefit.

**Q** I am an insured worker who pays contributions regularly. I know that if I lose my job I can draw benefits. What I want to know is how the rates of benefit are determined. Can you tell me?

**A** The rates of benefit are set out in a schedule in the Act and the rate applicable to a particular claimant is determined by reference to the average rate of his weekly contributions during the most recent 30 contribution weeks. The contributions in turn are directly related to his weekly earnings, ranging from 16c a week for earnings of less than \$15 to 60c a week for earnings of \$57 or more. Hence the benefit rates are related to the claimants' recent rate of earnings.

**Q** I have paid unemployment insurance contributions ever since it started. While I am now employed steadily, I will be retired in a couple of years. Will I receive proportionate benefits after retirement?

**A** If on retirement you are ready able and willing to work and are unable to find employment, you can meet the qualifying conditions, you will be entitled to benefit.

**Q** Since a sick person is entitled under the Unemployment Insurance Act, to benefits during the period she is unable to work, is a pregnant woman also entitled to benefits when she must quit her job?

**A** Benefits may be paid during sickness to those who were drawing benefits at the time they became ill. However, incapacity for work because of pregnancy is not considered to be incapacity due to illness within the meaning of the Unemployment Insurance Act. A pregnant woman who voluntarily leaves her employment on account of pregnancy is not considered to be available for work and therefore not entitled to draw benefit for the time being.

**Q** I am not able to do my usual type of work and will be laid off at the end of the month. I would like to take a course, say in typing. Would I be able to draw benefits while taking the course?

**A** The Act provides that benefits may be drawn while persons are taking a course to which they have been directed by the officer of the Commission. Whether or not a claimant can be directed to a course depends on the circumstances in the individual case and you should take this matter up with the local office.

**Q** Is a married woman entitled to unemployment benefit if she quits her work?

**A** If you become unemployed after you have been married two years or more there are no additional conditions to be fulfilled. If, however, you become unemployed within two years of your marriage, you cannot qualify for benefit unless you have made at

## Coleman Ball Team Win Benefit Game

The Legion Football Team were the victors in the benefit game which was played with the League winning Bellevue Legion team in aid of the Korner Fund.

The Coleman team scored a 14 to 3 victory over Bellevue with Coleman pitcher Bill Skura getting 19 strike outs.

With the sale of booster tags and donations at the game the Coleman team has raised \$75.00 toward the Korner Fund. This is a very commendable effort on their part.

The Coleman Legion team wish to thank all those who supported them and wish to give a very special vote of thanks to the Bellevue team who turned out full force for the game and all purchased booster tags for the Korner Fund. Thanks fellows you are a swell bunch of sports.

## Coleman Girl To Reside In Innisfail

Innisfail, Alberta will be the home of Mr. Fred Gaidica and his bride, the former Lorna Mary Knox, on their return from their honeymoon spent on the west coast of Canada and United States.

The candlelight ceremony was performed in a setting of white and tawny-gold chrysanthemums, in St. Paul's United Church, Coleman, Alta. Rev. Keith Syer of Acme officiated.

The bride is the older daughter of Mr. and Mrs. Chas. L. Knox of Coleman, formerly of Coronation, and Calgary, and the groom is the eldest son of Mr. and Mrs. P. Gaidica of Innisfail.

For her wedding the bride chose a graceful lace bodiced gown with short sleeves and hoop-skirted multi-tiered nylon net skirt falling to a small train. Her chapel length veil was held by a lace halo head dress and a string of pearls was her only ornament. She carried a white Bible crested by a white orchid.

In pretty contrast to the white bridal gown were the aqua blue, ballerina-length, crystalline dresses with matching picture hats worn by the attendants, Mrs. Stanley Clapp, matron of honor and sister of the bride, Miss Marion Knox as bridesmaid, carried sprays of white and tawny gold chrysanthemums.

Mr. Charles Twissel was best man and Mr. Ed Gaidica and Mr. John Gaidica, brothers of the groom, acted as ushers.

Mrs. Roach Cousins played the wedding music. At the reception held afterwards at Turtle Mountain Playgrounds, Mr. Arthur Knox, uncle of the bride, proposed the toast to the bride.

If you want to get a really good shine on your furniture, try using one of the hard-finish waxes of the type used for automobiles. They give a moisture resistant protective coating that really lasts.

At least 10 weekly contributions since marriage. And if you were unemployed at the time of marriage those 10 contributions must be subsequent to your separation from the employer for whom you worked at the time of marriage. In certain specified circumstances these requirements do not have to be fulfilled—for example, if you were discharged by your employer because his rule is not to keep married women in his employ, or if you were discharged on account of shortage of work.

**Q** The firm which employs me is closing down. Because my salary has been over the ceiling I have not been paying unemployment insurance for the past two years, although I have been employed for 10 years. Do I have to have 30 contribution weeks in the last 104 weeks in order to draw unemployment insurance benefits?

**A** In these circumstances the 104-week period (in which you must have contribution weeks) may be extended by the two-year period during which you were not insured, to a maximum 208 weeks. Similarly, the 52-week period may be extended by two years up to 156 weeks.

• This is a picture of the radar road testing machine which clocks the speed of cars travelling on the highway. The instrument on the tripod shoots a beam for 175 feet and anything in its path is recorded.—Review photo.

## Old Age Pensioners Hold Birthday Party

Monday, October 1st the Old Age Pensioners' Association Coleman branch celebrated their first birthday. From a small start in October of last year, when the Coleman branch was formed with Mrs. Nora Goulding as president, it has grown to a membership of well over 150. This branch is very proud of their advancement during the past year.

At the business meeting the opening was O Canada. Following this, acting secretary J. Rushon read the minutes of the previous meeting which were approved.

The meeting approved the dues for 1957 be \$1.15. This will include the per capita tax.

A Christmas party is being planned for the next meeting night on Monday, December 3. Anyone attending this is asked to give their names to the Association secretary before November 15 so that this party may be planned. This will be for members only. Tickets will be 75c.

Mrs. N. Goulding read report of the Convention she attended in Taber recently. Coleman will be hosts for the 1957 Convention of Southern Alberta Old Age Pensioners.

## To expand operations during coming year

Members of the Forest Policy Development Association at their first annual meeting in Vancouver decided to continue and expand their operations during the coming year.

Re-electing B. J. Keeley as their president the boosters of a sustained yield program for B.C. forests reported a series of successful presentations before the Sloan Commission.

In his annual report to members Mr. Keeley said "Our representatives at the hearings were the only persons consistently supporting forest management licenses, and we believe successfully defended the legislation from the attack of the opponents of sustained yield by private enterprise. It is my opinion that, until our entry on the scene, a successful effort to alienate the public's acceptance of the present forest management licence legislation was being made."

"I further believe," said Mr. Keeley, "that we were successful in our cross examination in refuting evidence presented by the opponents of forest management licenses. Our brief was one of the few which made positive recommendations for the improvement of the government's forest policy."

C. D. Schultz whose firm of consulting foresters and engineers managed the business affairs of the association during its first year of operations made several recommendations. Mr. Schultz pointed out that he felt the association should now be in a position to branch out on its own, hire its own secretary-manager and have its own offices. He said that the first sawmill was erected in B.C. in 1848. Approximately 100 years later B.C. enacted the first forest management licence legislation.

"History," said Mr. Schultz, "shows that such practice took place in other countries only when their forest resources were exhausted." He praised the actions of the B.C. authorities in taking steps to protect our forest heritage. The following were elected to the executive for the coming

## Salvation Army Again Opened

After being closed for several months the Salvation Army Hall will again be open for services.

Mr. and Mrs. Frank Saunders, who are in charge are very happy to be here and have found very many things of interest here.

Mr. Saunders stated the Red Shield Campaign will get underway in the near future. The objective for the C. N. Pass is \$125,000. It is hoped everyone will support this campaign and thanks are given to all for the splendid support in the past.

## Fire Prevention Week

The local Volunteer Fire Brigade are asking all Coleman residents to co-operate in getting rid of all fire hazards this week during Fire Prevention Week from October 7 to 13.

Basements and attics are sometimes full of what we may term as treasures, but from a safety viewpoint are fire traps which may turn out to be death traps. So get rid of all old papers, rags, etc. which may prove dangerous. Keep Coleman fire-free this week and every week throughout the year.

## Local Man Suffers Eye Injury

Mr. Dave Sudworth suffered a very painful injury to his eye last week. While repairing a fence a piece of wire passed through his eye. He was immediately rushed to a Lethbridge hospital by Mrs. H. Neddo. He had an operation on Wednesday morning but the results and the extent of damage will not be known for several days. Good luck Dave, we all wish you the best of luck and a speedy recovery.

## Prize Quilt to be Displayed

The beautiful quilt made by the Senior Ladies Group of the St. Paul's United Church which won a \$50 prize in the recent Star Weekly Canada-wide Quilt Contest will be on display in the United Church clubroom on Friday, October 25.

At this time the Senior Ladies' Group will hold a Halloween Pumpkin Pie Tea so attend and see this Labor of Love Quilt which these ladies are very proud of.

ENGLAND LAUNCHED: The 26,000-ton "Empress of England"—the second of the Canadian Pacific's new ocean going liners—is shown sliding down the way (upper left) following her launching by Lady Eden, wife of the Prime Minister of Great Britain, at Walker-on-Tyne. The new liner, sister ship of the "Empress of Britain," rests on the River Tyne (lower inset) following her launching. N. R. Crump, president of the Canadian Pacific Railway, is shown at the throttle of the world's fastest steam locomotive which pulled the train leaving London for Newcastle carrying those attending the launching of the new liner. The locomotive, known as the Pacific class "Mallard," is holder of the unbroken speed record of 126.4 miles per hour. The "Empress of England" will go into trans-Atlantic service between Montreal and Liverpool in the spring of 1957.

# World Happenings In Pictures

\*\*\*\*\*

**SLEEPING PEACEFULLY** in the arms of their mother, Anglo-Chinese actress Chin Yu, are her twin son and daughter, Ross Fitzgerald, left, and Megan Min You (Bright Jade) right, born recently in London, England. Chin Yu, whose name means Golden Jade, is the wife of Australian actor David Williams who is recovering from a spinal operation in another London hospital.

**SNOWLESS SKI JUMP** — People who can't get enough of skiing should bless Merrill Nelson, of Mount Baldy, Calif. The young chemical engineer has developed a plastic equivalent of the type of snow which is ideal for skiing. Alf Egeen, above, many-time U.S. ski-jumping titlist, tries out a 100-foot ski ramp at Mount Baldy, which is coated with the material, said to have the "feel" of the real thing.

## New developments

There are many new developments on the books for the farm of tomorrow. But we must realize that we cannot jump into tomorrow without having tried the proven scientific farming methods of today. The future will then take care of itself by natural progression—Humboldt (Sask.) Journal.

**PRINCESS MARGARET** wears one strap evening dress of pink tulle embroidered with flowers and sequins in this photograph taken for her 26th birthday. The picture was taken by Cecil Beaton in the drawing room of Clarence House, her London residence. Her Royal Highness wears her hair short, softly waved and piled high on her head.

**HELL, LICK 'EM ALL**—All such things as stamps, that is. Norman E. Foster, of Minneapolis, Minn., is a Pure Food and Drug Dept. man. He has to make sure everything meets the Department's standards, and so is tasting the glue on a new stamp issue.

**TURKISH BATH**—Ismet Inonu, president of Turkey's opposition People's Republican party, jumps from a pier for a dip at the resort island of Hybeli near Istanbul. Inonu, 72, who served as president of Turkey from 1939 to 1950, complained that police harassed him and dispersed the crowd watching him.

**DOCKSIDE—ENGLAND**—Paratroopers stand by on dockside at Portsmouth, England, as material is loaded aboard a British carrier before she departs for the Mediterranean to stand by pending outcome of the Suez crisis.

(The News, Maple Creek, Sask.—July 26, 1956)

**HOW SHY CAN SHE GET?** To stare at a queen is one thing—to be stared at by Britain's Queen Elizabeth is something else again. However, the "shy" airman hiding his face isn't overcome by the experience. He's demonstrating the action of an ejection seat canopy which shields a pilot's face when he must bail out from jet aircraft at speeds in the near-supersonic range. Her Majesty was treated to the demonstration while touring an air base at Marham, Norfolk, England.

ice across section of fuselage of a C-130 Hercules turboprop troop and cargo carrier to determine effectiveness of various protective coatings for use on the plane's underbody when ship is used in Arctic operations where landings on rough ice are necessary. Tests are made by Lockheed Aircraft at Marietta, Ga. Auto travels about 100 feet per second, simulating landing speed of the plane.

**KEEPING COOL**—The hot weather of the past few weeks has sent people scurrying for cooler climes. A good percentage of the population has taken time out for a trip to the mountains or summer resorts in various parts of the country. Cottage owners have moved out to the Cypress Park for the summer. The small fry couldn't be happier. Isn't a bit hot, they say, as they frolic in the local swimming pool. The above picture shows a number of local children enjoying themselves in the pool.

## A man of foresight

(From The Regina Leader-Post)

For a man who was born in Paris of Scottish parents and lived much of his life abroad, James Stuart Duncan went a long way in Canadian business.

When he retired a few days ago he was chairman of the board and president of the Massey-Harris-Ferguson Co. Ltd., the second-largest farm implement business in the world.

It all began when the late Sir Lyman Melvyn Jones, the colorful Canadian industrialist and a former head of the Massey-Harris organization, visited the home of James Duncan and told him stories of the opportunities in Canada.

The young Duncan took his education in France and Germany and then at 16 started work as office boy in the Massey-Harris office in Berlin, Germany. Thereafter he went up through the ranks, selling, administering and spending time at the bench in a Massey-Harris factory.

During the Second World War, the late Norman Rogers, then minister of defence, asked Mr. Duncan to serve as deputy minister of national defence for air, a post which he accepted and filled with distinction.

In this role he spearheaded the operations of the Commonwealth Air Training Plan.

In this period, too, he served as chairman of the UNRRA combined agricultural and food committee. After the war he played an important role in promoting trade between Britain and Canada and the "Buy British" campaign. His energies have never been limited to the job which paid him his salary.

In the post-war period, it has been the vision of James Duncan which has piloted his company, now the Massey-Harris-Ferguson Co. Ltd., into more and more overseas operations. Through his foresight Massey-Harris-Ferguson went after the European market at a time when the European farmer was catching up with his North American brothers and mechanizing Duncan's faculty of seeing the potential gave the Canadian firm and its European factories a strong head start.

James Duncan has never been afraid of experimentation and it was his decision which propelled his company into pioneering the self-propelled combine.

The venture was considered impractical by some manufacturers. It proved immediately successful and swept the agricultural world, bringing on a new era in harvesting.

In his retirement, James Duncan leaves behind him shoes which will be hard to fill but he leaves a great tradition, too.

Undoubtedly his energies will continue to be exerted in promoting the good of Canada, the farmer, and high ideals the world over. These are all part of the distinguished Duncan record.

## Beautiful Virden

(From The Virden Advance, Virden, Manitoba—July 11, 1956)

Nature and homemakers in Virden have been working hard in hand during the gardening season with unusually fine results this summer. Except for a hail storm earlier this month which gave gardens a beating, growing weather has been excellent with the profuse rain that the light soil here needs so badly, combined with warm sunny days.

New lawns started this spring around a good many new homes in town have come along beautifully as have trees and shrubs set out earlier this year.

Improvements have been made, too, to the gardens surrounding many older homes. All over town flowers are making splashes of vivid color amid the greenery of trees and bushes.

With the many new homes and buildings, with much of the downtown section remodelled in the modern manner, with home grounds all over town looking their best, Virden is indeed a beautiful town.

But Virden's beauty is not, unfortunately, unadulterated. Spoiling the picture is the litter that most of the time deluges downtown streets, the tall grass and weeds that have been allowed to grow unchecked on too many boulevards and lots, accumulations of junk to be found here and there in town.

In time the town may be able to afford sufficient maintenance men to keep everything neat and tidy. Meanwhile citizens should not more than their share in caring for boulevards facing their own property and should be careful not to become litterbugs.

## The Griffin Poplar tree

(The Bulletin, Brooks, Alberta)

When the Canadian Pacific Railway constructed the Eastern Irrigation District the region was virtually treeless. Later on Augustus Griffin was appointed superintendent of the project, coming to Alberta from Modesto, California, with a high reputation as an irrigation engineer. It also turned out that he had made horticulture a hobby and he launched a campaign of tree planting in Brooks and elsewhere on the project. He roamed creek and river valleys to obtain native specimens of plants, shrubs and trees to cross with more beautiful and more productive varieties. His work in that field gained him fame in horticultural circles throughout the west.

Mr. Griffin passed away some years ago but the results of his efforts remain to beautify the farm and town gardens and streets, a living tribute to the departed. Now we note that the Provincial Horticultural Station has named a new poplar tree the "Griffin poplar." This variety is fast growing and is of unusual pyramidal habit. The tough, willowy branches are dense, sharply ascending and are well clothed in glossy, dark-green leaves.

It was a nice idea on the part of the Horticultural Station to pay this tribute to a man who did so much for horticulture in this district and province.

—Canadian Army Photo

**NEW FRIENDS**—One of the best features of the army's seven weeks summer camp for cadets at Camp Dundurn, Sask., is the opportunity for all boys to see how the other half of the world lives. Great care is taken to see that each platoon has representation from every section of northwest Ontario, Manitoba and Saskatchewan. Here a group of new pals hold a "bull session" in the tankhouse. Left to right are Norman Bourassa, North Battleford; Bob Clements, Killarney, Man.; Gord Russell, Wadena, Sask.; Charlie Marchildon, Saskatoon and David Waters, St. Boniface.

## 800 Army cadets complete annual training Camp Dundurn

Two Manitoba army cadets were awarded the top prizes at the graduation of over 800 boys attending the annual cadet summer training at Camp Dundurn, Sask., but Saskatchewan youths took six of the 10 awards. Best cadet during the seven weeks course was Neil Donald Laird, Winnipeg, and best cadet instructor was Nicholas Prokopchuk of Brandon.

Saskatchewan's Lt.-Gov. W. J. took the salute for the ceremonial march past and presented the Major-General W. J. McGill, general officer commanding Prairie Patterson inspected the cadets and prizes. He was accompanied by Command and Brig. H. W. Love, commander of the camp.

Hundreds of invited guests and parents from all over northwest Ontario, Manitoba and Saskatchewan witnessed the morning's ceremonies in brilliant sunlight. After lunch the Cadet Services of Canada Officers Training Company staged their marching out parade for the lieutenant-governor and the cadets put on displays of skills and drills they had learned.

Other prize winning cadets were: best cadet in A Company, D. S. T. Edey, Oak Lake, Man.; B Company, H. E. Kellett, Carrot River, Sask.; C Company, R. A. Perrett, Invermay, Sask.; D Company, E. J. Laenger, Lintlaw, Sask.; E Company, J. R. Gray, Winnipeg; F Company, H. J. Greycy, Duck Lake, Sask.; best shot in rifle coaching course, N. F. Graff, North Battleford, best shot other than rifle coaching, Strathcona Trust Trophy, D. G. Lindberg, Saskatoon.

In the officers training company Wayne G. Glass of Rosetown, Sask., won the Same Browne belt as leader of the Grade A certificate course and Capt. J. T. H. Todd of Fort William won the award as leader of the chief instructors course.

Saskatchewan Provincial Rifle Association prizes were awarded to three cadets, P. D. Guillemain of St. Boniface had won the cadet aggregate and the 500 yard prize; J. E. Eaton of Port Arthur took the 200 yard shoot and A. W. Stewart of Winnipeg was the 600 yard winner.

Approximately one-half the workers in the world are engaged in agriculture.

## Growing beards

There are certain disadvantages in growing a beard these days, but a man does have the right to grow one if for no other reason than to prove he is capable of it.

—Turro (N.S.) Weekly News

## TRY AND STOP ME!

By BENNETT CERY

"The average woman" maintains a prominent analyst who obviously is looking for trouble "is too inquisitive to play poker well. In an evening's play she'll have a dozen hands where 'calling the bet' displays a suicide complex. Yet she no more can resist throwing in the chips than she can help looking at the label in a friend's new coat."

Despite this opinion (shared by most other male poker players) one of the first big-selling books on the game, points out Jerry D. Lewis, was written by a woman. It was published in the gay nineties, and the author was listed as "A. Howard Cady."

No sane editor would have admitted, of course, that the "A" stood for "Alice."

The mother of four strapping sons inhaled on taking driving lessons at the age of fifty-eight. Her loving sons now refer to her as "Oh, Ma, the Dent-Maker."

A tourist patronizing a Gypsy fortune teller in Venice, Calif., got something of a surprise. "Hey!" he exclaimed. "Do you realize your crystal ball has three holes in it?"

"Sure," beamed the gypsy. "I put 'em there myself. I also give bowling lessons."

Lecturing a class of embryo journalists on the dangers confronting anybody who always thinks he can outsmart the competition, Abel Green, editor of Variety, told this story to bear out his point:

A man bought some fine Havana cigars and had them insured against fire. After smoking them all, he put in a claim on the grounds that they had been destroyed by fire. The indignant insurance execs naturally refused to pay, so the wisacre sued. What's more, he won his case as the judge had decided that once the company had accepted a premium and issued a policy, it was financially responsible.

The sharpie accepted payment but had little time to gloat. The insurance company had him arrested for arson!

## The 'cold' war progressing

Some surprising facts have emerged concerning the common cold, according to a release from the Metropolitan Life Insurance Company.

Colds are more frequent among women than men, and children have more colds than adults. Furthermore, adults in families in which there are young children have more colds than those in families where there are only older children. The common cold is the leading cause of absenteeism reported among elementary school children, and this includes the little angels who come up with a special cold on the day when a tough exam is scheduled.

The five-year period from 1951 to 1955 shows a seasonal pattern; a rise in the incidence of colds from a minimum in summer or early autumn to a peak in mid-winter, followed by a rapid decline to a level which approached the minimum level by late spring.

These five-year data relate to the recorded experience of the U.S. navy and marine corps, which goes to show that the common cold is just as lethal for rugged marines and sailors as anyone else.

The statisticians, after confessing that until recently, research on colds had been desultory because the possibility of its control seemed dubious, came up with a ray of hope.

"In recent years, interest has been stimulated by the discovery of laboratory procedures which provide better means of identifying the causative agents of the common cold. The progress made in this area enhances the prospect of developing effective vaccines and new methods of therapy."

## A voice from 'down under'

The English-speaking countries of the British-led Commonwealth of Nations often serve as bridges of understanding between Britain and the United States. The frontier is not far behind them, and opportunity seems more at hand than in older countries.

When one of their leaders speaks on Anglo-American relations he does so from a sort of middle ground as the special friend of both Britain and the United States. That is why the warning which Australian Prime Minister Robert G. Menzies spoke in New York the other day has special meaning. Menzies was able to see clearly that one danger of the new Soviet diplomacy is its effect on Anglo-American relations.

Certainly what he called 'the smiling cold war' has brought to the surface in recent weeks the difference of emphasis with which London on the one hand and Washington on the other view the post-Stalin world. Mr. Menzies declared that a primary Soviet motive was still to drive a wedge between the United States and other Western countries.

"The smiling cold war" need only win on its central sector, the field of Anglo-American relations, to cause confusion all along the free-world front. Mr. Menzies' warnings for this reason are good will and 'caution above all things'; and Western unity, whose core is Anglo-American unity.

Digging graves used to be part of the duties of school teachers in New England in 1661.

AN OFFER TO EVERY INVENTOR. List of inventions and full information sent free. THE RANSAY COMPANY, Registered Patent Attorneys, 273 Bank Street, Ottawa, Canada.

## Try my delicious DESSERT BRAN MUFFINS

Sift together 3 times  
2 c. oven-ready pastry flour  
or 1 1/2 c. enriched  
all-purpose flour  
2 tps. Magic Baking Powder  
1 tsp. baking soda  
1 tsp. salt  
Mix in:  
1 1/2 c. crisp breakfast bran  
cereal

1/2 c. lightly-packed brown  
sugar  
Beat until thick and light  
1 egg  
Stir in:  
1 c. sour milk or buttermilk  
1 tsp. vanilla  
6 tps. butter or margarine,  
melted

Make a well in flour mixture and  
add liquids all at once; mix lightly  
until just combined—do not over-  
mix. Two-thirds fill greased  
muffin pans with batter. Bake in  
moderately hot oven, 375°, 20  
to 25 minutes. Makes 12 to 15  
average-sized muffins.

You get  
lighter,  
more  
delicious baked goods  
with dependable  
MAGIC Baking Powder.  
Guard against failures  
... get MAGIC today!  
Costs less than 1/4  
per average baking

# YOU Are Asked To Observe FIRE PREVENTION WEEK OCTOBER 7-13 - And Every Day Thereafter

The carelessness and indifference of people is the cause of fires in the home, place of work and in our forests. The many deaths resulting from fires can be attributed to this neglect. "DON'T GIVE FIRES A PLACE TO START" is good advice and a habit to acquire. Your Fire Department is conscientious in their endeavor to hold depredatory fires in abeyance through inspection service, but they can't do it alone. THEY NEED YOUR HELP to prevent fires!

- A careless smoker is a menace.
  - Faulty electric wiring and overloaded circuits are dangerous.
  - Fires are caused by defective chimneys, furnaces, pipes and cooking equipment.
  - Spontaneous ignition can be caused by oily rags, paint and rubbish.
  - The careless use of kerosene and other inflammable liquids can result in death.
  - Leaving children within reach of matches and electric and gas switches can have serious consequences.
  - Put your campfire out and don't light brush without proper care.
- Use your common sense, KNOW AND ACT ON THESE THINGS.  
Fire is not a chance occurrence but a bad error!

GOVERNMENT OF ALBERTA  
Department of the Provincial Secretary

HON. A.J. HOOKE  
Minister

A. E. BRIDGES  
Fire Commissioner

## OF MANY THINGS (By Ambrose Hills)

### MANITOBA LIQUOR LAWS

The province of Manitoba has been feeling its oats lately. It won nation-wide praise for its modern traffic regulation and now it is attempting to become a model for all provinces in the distribution, sale and regulation of the liquor trade. So far, it has gone about the job in a model manner.

First, it appointed the Bracken Royal Commission to study the law as it stood. The choice of Bracken was perfect. No one could accuse him of sympathy with liquor interests. Rather the reverse.

The Bracken Commission did not spare time, energy or money in its study. It found the old laws pernicious, and the drinking habits of Manitobans little short of barbarous. It recommended liberalization of the laws relating to distribution and sale of liquor, together with strict application of laws relating to consumption of the stuff and behavior after consumption.

The legislature, on the basis of the report, drew up Bill 14 as a first step in the implementation of the Bracken Commission's recommendations; and then set up a Committee on Alcohol Education to educate the public as to the nature of the legislation in the first instance, and the responsibilities of the consumer in the event that the liberalization of liquor laws are adopted in the various communities, where voting may take place any time after October 1st.

As this column is written, Winnipeggers are supposed to be discussing the pros and cons of the vote in that city. Mayor, aldermen and politicians are amazingly silent. The brewers and liquor manufacturers are saying nothing. Even the restaurant keepers, who have invested small fortunes to modernize their premises to conform to licence requirements, are keeping mum. Hotelkeepers the same. It would seem, almost as if there were a conspiracy of silence.

The reason is obvious. Winnipeg's "dry" faction has more orators in its ranks than any other group in the world. Some of them are so persuasive they could talk for him into a negative action by propaganda from the "wet."

All this is very interesting. The difficulty, however, is that in the silence the Bracken report has been forgotten, and many people do not even know on what date the vote takes place. And, since experts predict that a small vote means a "no" vote, Manitoba might not get a chance to be a model, after all.

### Concept of game management

The modern concept of game management is about the same as that of modern farming. You have a crop to harvest, get on with it. But leave the soil fertile, and be sure to have the seed ready for the next year.

Game — and fish, too — are pretty much the same. When the number of animals or fish ex-

ceeds the ability of the country to feed them, nothing but trouble comes about. It is something like planting kernels of grain too close in the rows. You get more stalks, but no more kernels.

Deer, for example, become scrawny, diseased and sometimes starvation victims if they multiply too fast in a given area. Cropping takes care of the surplus. Hunters and predators do the cropping.

Too many fish in a lake or

stream means small fish. Too many trees in the forest means small trees.

But place that evidence before a game club and you will hear an argument. Partly because of old timers who recall those "good old days," and partly because of the proportion of hunter failures in the field.

Hunters and fishermen are their own severest critics, so they deserve to criticize the work of others. For instance, you've heard a thousand times the alibi of shooters who missed; or fishermen who arrived at their favorite stream the day after the fish were biting.

Consequently, when a scientist stands before a game club and says its a good thing to kill more deer in a certain district, you'll be sure to hear a howl go up from the man who sees things in a different way.

The scientist draws on learning — information gathered through the experiences of others in many other places, under varying circumstances. The oldtimer draws on the experiences of a few — possibly only his own.

We still have lots to learn about nature and her merciless way of taking care of her children. Survival of the fittest is still the law in the woods and waters, and the weakling who cannot keep up with the herd is still fair game to the predator.

People used to be like that, too. But now we are civilized we give special care to the weakling. Obviously we cannot extend that type of social welfare to wild life, so we can only provide good average condition for them.

That means, among other things taking the crop so that there is food enough to bring along a strong breeding stock.

Through the use of regulated seasons we make sure of the breeding stock. Through the use of regulated seasons we make sure of the breeding stock. Through the use of limit laws, we take care of a fair distribution of game among hunters.

Wildlife management is an exacting science. It calls for a long university course, coupled with a liking for the outdoors. Most of all it calls for a cast iron disposition that doesn't get too dented by criticism.

Yet criticism is a good thing. After all, our democratic governments put the leader of the opposition next to the leader of the governing party as far as importance is concerned.

So the constructive critic of the game department is considered an honorable gentleman, whose efforts assist in the guidance of keepers of our wildlife.

Likely as not he is a member of "our local fish and game club. If you drop in on that club, you'll meet him and the other men and women whose suggestions and criticisms are the seeds of future legislation.

Behind the game clubs is the B.C. Fish and Game Council, a directive body comprising representatives from various areas of B.C. The Council is the motive power which homes the club resolution to the desk of the government, where it can be examined in the light of public welfare.

The Council is a conservation agency too. This article is one of the efforts in the field of conservation education. Your comments are welcome through the editor of this paper, or direct to the Council, 125 Talmisan Avenue, Vancouver, B.C.

### Think First

(Anonymous)

Speak of a man as you find him. Censure alone what you see. If a man is blamed, be reminded. From faults there are none of us free.

If the veil from the mind could be lifted.

Thoughts written upon a brow: Many would pass by in scorn. That are loaded with honors too.

Many a good man is ruined. And many a good woman, too. By someone starting a rumor. And not a word of it true.

So when you hear someone knocking. A man or a woman's good name. Bet it's a lie — forget it. Never repeat it again.

Here's a good tip for you cooks. If you are going to cut marshmallows, put them in the freezer first until they are partly frozen. Then they won't stick to the scissors. Much less gooey!

## "Face Facts" — and Assure Forest's Future

### Trees and Tree Farming Provide A Cash Crop

WINNIPEG—Right now the forest industries are Canada's biggest business. The woods operations, the pulp and paper companies, and the lumber mills together produce goods valued at some \$1 billion a year. They employ close to 400,000 people and they annually pay out some \$250 billion in wages, more than any other Canadian producer. In addition, they account for a third of the nation's exports.

To do all this, the forest industries annually harvest a whopping 40 million cords of wood and produce another \$700 million of mill supplies and agricultural products. Yet within the next 25 years it is estimated that the wood harvest will increase to some 65 or 70 million cords. Forestry is big business now, but it's going to get a lot bigger.

These were the forest facts revealed at a National Forestry Conference held in Winnipeg this month. The Conference, attended by 150 representatives of leading national organizations studies the future of Canada's forests, especially how they should be used, managed, and conserved.

The conference was sponsored by the Canadian Chamber of Commerce, the Canadian Forestry Association, the Engineering Institute of Canada, and the Canadian Institute of Forestry. Its purpose was to bring together forestry experts, business men, government officials, and civic representatives to discuss ways and means of improving forest farming in Canada. The principal speaker was the Hon. Jean Lesage, Minister of Northern Affairs and National Resources, Ottawa.

J. L. Van Camp, secretary of the Conference and general manager of the Canadian Forestry Association, called upon the Conference to frame a new forward-looking forest policy that will encourage forest management.

"Forest conservation should never mean forest preservation," said Mr. Van Camp. "There is no point in permitting trees to grow, mature, die, and then rot. The best kind of conservation is firmly rooted

Junior foresters from across Canada chat with the Hon. Jean Lesage, Minister of Northern Affairs and National Resources, Ottawa, at the National Forestry Conference in Winnipeg. They are, (from left to right) Ray Chesin, fire prevention poster winner, Winnipeg; Donald Stevens, tree farm owner, Woodstock, Ontario; Mervin McConnell, Ontario 4-H Club forest winner, Woodstock, Ontario; Mr. Lesage; Glen Nymark, High School Forestry Student, Dryden, Ontario; Fred Blinck, Boy Scout good turn demonstrator, Winnipeg; and Bruce Nicoll, Canadian Forestry Association Junior Forest Warden, Vancouver, B.C. (Upper right) A tree farmer admires his Tree Farm sign. Tree farms are managed woodlots that yield an annual saleable crop of wood. (Upper left) A pulp and paper company forester checks the growth of a young poplar at a company-owned forest research station.

In management, that is the growing and harvesting of trees on a perpetual yield basis, just like a farm crop. In this way we can keep our forests green forever, and yet reap a valuable harvest from them—a harvest that generates wealth for every Canadian."

Speaking on the Tree Farm Movement, Mr. Van Camp said

It is the most important single step that individual Canadians have taken in active forest management. Hundreds of small and large private woodlot owners now display the Tree Farm sign as certification that they are growing trees on a managed basis to provide continuous crops, and that they are protecting their woodlot

against fire, insects, and disease.

The Tree Farm Movement was initiated and sponsored by the pulp and paper industry and is administered by the Canadian Forestry Association. Anyone with a woodlot they are prepared to manage can apply for certification as a tree farmer.

# Zeidler Plywood Corporation Opens New Edmonton Mill

EDMONTON, Alta. — The opening of the new Zeidler Plywood Corporation Ltd., plywood mill in Edmonton, brings a new product and a new industry to the city. The plant, which occupies over 50,000 square feet of floor space and cost over \$1,000,000 to build will produce ZEDPLY from

Alberta poplar trees. The opening ceremony will be held at the new plant of Edmonton's south side and will be presided over by W. R. Zeidler, president of the new company. The Honorable N. A. Willmore, Minister of Lands and Forests for the Province of Alberta will address a gathering of over 150 prominent Edmonton business men and civic and provincial government leaders. He will pull a lever which will start the flow of veneer from the

gigantic peelers lathe. In speaking of the plant prior to the opening Mr. Willmore said, "We welcome this new industry because it provides employment for Albertans; it fills a need in the rapidly expanding building industry; and because it adds another name to the list of natural resources in the province." He was referring to the use of poplar trees in building, a tree long considered nothing but a 'weed' in the local forests. The personnel of the new ply-

wood mill will consist entirely of Alberta residents, with the exception of key personnel, chosen for their wealth of experience in plywood manufacture in the West Coast region. Some 50 to 70 people will be on duty each shift, in addition to the hundreds indirectly supported by the necessary logging transportation and fabrication associated with the use of this product.

Because of its peculiar grain qualities, ZEDPLY, made from poplar wood, provides an excellent surface for finishing and its strength and durability make it well-suited for the manufacture of cabinets, counters, fixtures, furniture, sub-flooring and sheathing for home and industry. It will be made in all standard sizes and thicknesses and will be available for distribution all across Canada. Because of the abundant supply of raw material, it will provide a constant supply of very important building material for the trade.

The executive officers of the new company were chosen from prominent W. R. Zeidler, who is also in western industries. President of the W.R. Zeidler Ltd., and affiliated companies, has over 30 years' experience in the building business in Edmonton. First vice-president, C. V. Geddes, is a resident of Prince George, B.C. and has over 20 years of successful lumber and mining experience behind him. Second vice-president H. L. Reynolds, is the president and manager of Reynolds Manufacturing Co. Ltd. a well-known Edmonton garment manufacturing company. A. G. Hetherington, secretary-treasurer of Zeidler Plywood Corporation is also president and manager of Hetherington Lumber Ltd., a wholesale lumber firm in Alberta. The combined experience and business acumen of this group will be of great importance in the future policies and soundness of this new Alberta industry.

## Trading Stamps Are a Menace!

The Retail Merchants' Association of Canada Inc., and the National Foods Division have always believed that the use of Trading Stamps is not in the public interest because:

- They disrupt normal marketing methods.
- They confuse customers as to real values.
- The exert "influence" to buy that diminishes the need to meet competitive conditions.

### R.M.A. Policy

The Retail Merchants' Association of Canada Inc. will take action through the courts if necessary, to prevent Trading Stamp plans being used because such plans are illegal, as stated in the Criminal Code.

It is the policy of R.M.A. to make sure that the intent of Section 322 and 369 of the Criminal Code is carried out by manufacturers, premium houses,

wholesalers, retailers and others. The public must be safeguarded at all times.

The Retail Merchants' Association Inc., will ask that offenders be dealt with to the full extent of the law.

### The Question:

How to administer the Association policy to prevent Trading Stamp plans and earn the maximum assistance of law enforcement authorities in bringing offenders to court.

### The Answer:

Be it resolved that the Retail Merchants' Association and the National Foods Division continue to oppose trading stamps, coupons giveaways and lotteries and that a committee be appointed, representative of both the Retail Merchants' Association and the National Foods Division, to make an immediate and complete study of these problems throughout the whole of Canada and take whatever action is necessary, legal or otherwise, in the interests of retailers and consumers it is further resolved that this committee advise Provincial bodies the necessary steps they should take when dealing with this problem at Provincial level! It is further resolved that this committee enlist the support of all other interested parties.

### Action

Our Association has been steadfast in its pursuit of enforcement of this section of the Criminal Code, through the Attorney General's Department, in each of the various provinces.

Now we need tangible support from Retailers.

If there is a trading stamp plan operating in your immediate area the products you sell are being given away like prizes out of a popcorn box.

You can help yourself and all Canadian retailers by registering your complaint against such a plan to your local police office today.

Yours very sincerely,

D. A. Gilbert,  
general manager,  
Retail Merchants' Association of Canada Inc.

## Transfusion Service Use Disposable Bottles For Blood

Canadian Red Cross Blood Transfusion Service out of Calgary sub-depot is becoming more streamlined all the time. Some months back disposable plastic transfusion sets were introduced and now the depot is using disposable bottles, on a trial basis.

The new disposable bottles come ready for use, from the manufacturer. Shorter and broader than the bottle with which Canadians have become familiar, the new bottles are graduated, contain the sterile anti-coagulant, and are sealed with both a rubber stopper and a metal cap. The stopper is marked for inserting the glass tubing for both taking the blood and using it, and a glass air-way is affixed permanently.

Each bottle carries a label bearing the information "Gift of a volunteer donor," is marked with a Red Cross and also gives information on the blood and storage regulation.

The new bottles, still on an experimental basis to Red Cross, should eliminate many handling problems. Previously bottles had to be washed, the anti-coagulant added, and then sterilized with the latter two processes done in Edmonton depot. After use, the empty bottles were returned by the various hospitals.

The new bottles will eliminate the extra work in Edmonton, save carrying charges between the two depots and also save carrying charges for the empty bottles from the various Southern Alberta and East Kootenay hospitals.

Disposable plastic "taking sets" are also in use in some parts of the continent, but to date the Alberta division has not used them.

## Keep those hands loose

Many medical and physical education experts believe that there is a definite relationship between flexibility and youthfulness. One of the signs of approaching old age is loss of flexibility, and you can postpone physiological aging by maintaining your suppleness through exercise. In addition, flexibility is essential to overall fitness.

One extremely important area to keep loose and flexible is the lower back. Time spent in stretching and loosening up this area also will help you avoid that all-too-common low back pain.

Here's an excellent exercise. Sit on the floor with your legs straight out in front of you. Now, holding your arms out in front, bend forward and try to touch your jaw to your shins. Sit back, and then repeat 10 or 12 times. It may help if you grasp your

shins with your hands and pull yourself down.

Even if you can't reach your shins with your jaw, keep making the effort anyway. That's the important thing, because after practice you'll notice that the exercise will start to get easier as your back muscles lengthen and are loosened up.

## Pre-season conditioning

Whether your sport is football, hockey or basketball, now is the time to start getting in shape for the coming season. You'll be far more valuable to your team if you start early enough so that you're in top shape when regular practices start, because you'll make faster progress and be less likely to suffer injuries.

Certain key areas should receive extra special attention, and one of these is the stomach and hips. An exercise called the Jack-knife is tops for developing the muscles in this department, and here's how you do it. Lie down on your back with your legs straight and your arms stretched out over your head. Keeping arms and legs straight, sit up quickly and at the same time raise your legs, trying to touch your feet with your hands at a point above the hips. Start slowly, because the co-ordination may be difficult until you get the knack of it. Do six, rest for a few seconds, then repeat. Keep repeating until you cannot handle six in a row. Every few days, try to add extra repetitions to keep building up your strength.

## New bridge in Hudson Bay area

A contract has been awarded to J. Goran of Medicine Hat, Alberta, for the construction of a 400-foot bridge on Highway No. 9 over the Red Deer river, south of Hudson Bay, according to an announcement recently by M. B. Pierce, Bridge Engineer with the Saskatchewan Department of Highways. The bridge, to cost an estimated \$350,000, will be a three span continuous reinforced concrete girder structure, with the spans measuring 101 feet, 126 feet and 101 feet respectively. The bridge deck will have a width of 24 feet between curbs, and 27 feet including curbs. There will be unrestricted overhead clearance.

Mr. Pierce said contractors will utilize two main concrete piers which were constructed by Highways Department bridge crews in 1952. An obsolete 126 foot steel truss span will be removed from the piers; they will be extended, and the new bridge placed thereon.

A temporary bridge and dewatering were constructed by the Department of Highways near the site of the new bridge last month. The contractor is now moving to the job and it is anticipated that work on the new structure will get underway late this week or early next week.

**GUIDED MISSILE:** The U.S. army released this photo of the 'Dart,' the smallest weapon in America's growing arsenal of guided missiles. Specific information on the weapon is on the Pentagon's secret list, but it is known the missile is small enough to be moved with mobile artillery units on a battlefield. The army did not disclose whether this is a photo of the actual Dart or just a model.

## BEWARE OF POISON IVY

When setting out on a hike, a piece of strong household soap is a good item to include in the pack for use in case of contact with poison ivy. The plant does not lose its menace even when the leaves have fallen, since berries, stem and roots still can cause the painful burning rash usually associated with contact with the leaves. Washing with a strong lather of the soap or any detergent will remove the oil that causes the trouble, providing it is done soon after contact.

## Quick Canadian Quiz

- Which of the provinces has the largest proportion of its area under agricultural cultivation?
- In what years did the provinces of British Columbia, Saskatchewan and Newfoundland enter Confederation?
- In indirect taxation only Canadians are paying to the federal government \$4 million a week. \$16 million, \$32 million?
- Immigration to Canada reached a record high of 400,000 in what year?
- Employment of Canadians in manufacturing reached its post-war peak in what year?

## ANSWERS TO QUICK QUIZ

- In 1953, when 1,353,000 were employed in the month of September, about 50,000 more than the present total. 3. More than \$32 million a week. 1. P. E. I., about 85 percent of its area is cultivated. 4. In 1913. 2. B.C., 1871; Sask., 1905; Nfld., 1949.

(Material prepared by the editors of Quick Canadian Facts, the pocket annual of facts about Canada.)

## Driving courtesy

It's strange how some motorists, who wouldn't think of violating other laws, will wantonly disregard the highway traffic act. Those qualities that characterize men and women as ladies and gentlemen are often tossed aside when they place themselves behind the steering wheel of a motor vehicle. —Markdale (Ont.) Standard.

**EDITOR — Bozo** — first name, last name, take your choice—bills himself as an assistant editor of the "Bovary News," a publication which concerns itself with news of the gentlemen of the road, particularly those members who make up New York City's hobo colony.

## Hunters urged to protect rare birds

With the shooting season for waterfowl just a matter of a few days away, sportsmen should be on the alert to protect some very rare birds in the province, Fred Bard, director of the Saskatchewan Museum of Natural History said. Many of these rare birds are similar in appearance to some common birds and could become extinct in the province if care is not taken by hunters when shooting, he said.

Hunters can help protect them by learning to identify either the rare birds or the common birds so as to know exactly what species they are shooting at.

Some of the rare birds which are often mistaken are Ross's Snow Goose, Black Brant, Whistling Swan, Pinnated Grouse, Trumpeter Swan and the Whooping Crane.

Zeuxis, ancient Greek painter, is reputed to have painted a bunch of grapes which looked so realistic that birds pecked at them.

Mr. and Mrs. J. Hanrahan and family were visitors at Fort Macleod over the holiday week-end.

Mrs. R. Hill, accompanied by her son Michael visited her mother Mrs. R. Pattinson.

### New Nickle Development

Development of a giant nickle mining empire in Manitoba by International Nickle Co. of Canada, says Frank Kaplan in The Financial Post, is practically assured with announcement of new premium-price incentives for nickle production to be paid by the U.S.

The new U.S. policy announced this week provides for negotiation of premium prices above present 64.5c a lb. level for new production of the metal. The premium would cover the 'unusual' cost in getting into production.

This new policy not only makes the \$200 million Inco project a near certainty but also.

Will give major impetus to the rapid pace of development and search for new nickle supplies by Canada's high-flying mining industry. Already Canadian mining organizations have been seeking out nickle, particularly in company with copper.

Gives a sharp impetus to shares of mining companies interested in nickle. Leading nickle issues like Inco and Falconbridge surges sharply higher on stock

### Ethel Knox

Wishes to announce that she will accept a limited number of students aged 7, 8 or 9 years, who wish to begin

### Piano Study

Group instruction will be given in the early lessons  
PHONE 2909

exchanges and a rush of buying spread into a wide list of smaller producers and prospects.

Is expected to give a major push to development of nickle. Laterite deposits in the East and West Indies where some Canadian mining companies have interests are sulphides.
